SIERRA

SERIES

Photograph at CASA 425

A Natural Wonder

Forming the backbone of the state of California is a monument to size and strength. The Sierra Nevada mountain range is home to the highest peak in the continental United States, National Parks, Volcanoes, and Forests made of the most massive living things in the world. The Sierras stand so imposingly that they impact the weather of the entire Southwest, soaking up the elements to hydrate farms that feed people all over the world.

The Sierra Series by California Umbrella is a monumental shift in the expression and beauty of a Market Umbrella. Traditional and timeless describe the coveted aesthetic of the wood market style parasol, a design that has been around as long as man-made shade has been a concept. With Sierra, we now introduce molded fiberglass framework that is finished with the warmth and character of a subtle wood stain, the hardened longevity of modern materials, and the embellished styling of an artisan piece. The resulting product is a refined series of umbrellas that set an imposing standard for the natural beauty and strength of a wood market umbrella. For every application, the Sierra series stands alone.

TIMBERLINE

SERIES

A Sentinel of Shade

The conditions are harshest at the timberline, so that is where the strongest and toughest trees root themselves and grow. This is why the oldest and largest specimens can be found in these higher elevations. California Mountains boast the widest collection of these giants and inspire our most robust collection of Wood Market Umbrellas.

In the Timberline series we've sourced the solid 2 inch wooden masts that stand firm in the wind, and bolstered them with 3/4' stout fiberglass ribs that perform in conditions not suitable for other shade products. The elegance and beauty of these overbuilt specimens is incomparable, they stand as shelters of shade even in the harshest environments.

GROVE

SERIES

The Traditional Standard

California’s forests are famous the world over for their assemblies of the most majestic trees and diversity. The hundreds of groves of Red-woods and Sequoias that cover the coastal forests and granite faces of the Sierras give us our inspiration for the Grove Series

Wood Market umbrellas are classic, and the Grove series gives you all the tradition and attraction they have always offered. The sourced hardwoods are subtle grained and finished to provide the warmth and character expected from a wood product. The Grove series comes in sizes across the umbrella spectrum to mix and match in any combination.

ALLURE

SERIES

An Excess of Abundance

The bountiful opportunities and resources offered by our state make it a dream destination. Lavish lifestyles and opulence are woven into the fabric of the culture, and broadcast around the world in the images of our art and media. The excess isn't skin deep, it starts with the embarrassment of natural riches and culminates in the way we've dressed our cities with extravagance for the world to see. With the constant rebirth of landmarks, architecture, art, and technology, a true reflection of California is in the depth of its abundance.

The Allure Series demonstrates that attraction and excess are the hallmarks of quality. We've built this series using a beautiful and excessively robust stainless steel mast. The heft and finish of this single piece of refined steel represent a luxury of indulgence, delivering clean and contemporary lines from a deftly overwrought piece of natural material. Above it all is a flexible canopy of fiberglass ribs that dares the elements by its span and resistance. Taken together, the Allure series of the California Umbrella collection delivers classically understated aesthetics to your space, sumptuously emboldened by an irresistible abundance of performance.

OCEANSIDE

SERIES

Photograph at CASA 425

Focused on Performance

The association that California has with its beaches is renowned and established by generations of sun seekers. With the ocean looming so large in the culture of California, the connection to it forms an essential part of our identity. The relentlessly moving salt air and waves, toiling under an intense sunny gaze, both lure and punish in equal measure.

Our Oceanside Series is perfectly adapted to thrive, exposed to the stark beauty of the elements. We've designed this collection completely with high density reinforced fiberglass material. Light and flexible, it deflects the energy of movement so that a gusty breezy fades to obscurity. Dense and strong, it braces against the beating sun and the barrage of corrosive elements to stand beautifully undisturbed in service. Defying conventions, the 7.5 foot model can extend or contract its mast to fit into any need or space, so that one shade can shelter a casual afternoon lounging in the sand, or an installation of bar height tables for a crowd of customers.

When you spend as much time interacting with sun drenched shores as we have, focus turns towards performance. What follows is the Oceanside Series.

REPLACEMENT COVERS

To order-
Select canopy size and use the model number for a cover. (C758 for a 7.5" cover, C908 for a 9" cover, C118 for a 11' cover). Then add the fabric code for the color and fabric type of your requested cover.

California Umbrella is building a new wave of customization possibilities by turning to a time tested principle in the efficiency of manufacturing; Standardization. Most all of our 7.5 , 9, and 11 foot octagon shaped market umbrellas are made to receive a standardized cover. This offers our customers an unparalleled opportunity to re-imagine their shade aesthetics. This simple solution to a problem found across the shade products industry is changing the way shade consumers think about their design choices.

Replacement covers for our umbrella frames are an easy way to change out the décor of a space from season to season, or for special occasions. If the need arises to replace a canopy, our standardized cover sizes mean that you can change materials or colors and patterns and continue using the fantastic Umbrella frame in your service.

If you have a Market style Umbrella from our line, you can store a spare canopy, or stock different colors to support your favorite teams or throw a themed party, all of our production canopies are made to be interchangeable.

Swapping out a canopy is a simple process where you remove the pockets of the canvas from the rib ends, drape a new cover onto the frame and place the new pockets back over the rib ends. In a matter of minutes a commercial application with dozens of umbrellas could be completely refaced at a fraction of the cost to completely replace perfectly functioning Umbrella frames. Bring your most creative design ideas to the table, and don't just buy and Umbrella, truly embrace a shade solution.

SUNBRELLA 101

Sunbrella fabric is an instantly recognizable standard of excellence in the world of textiles and with consumers. It has a beautiful performance, offering the widest array of color, pattern, and design all built with 100% solution dyed Acrylic canvas. We proudly offer a curated assortment of the most popular colors demanded by consumers, as express products that can be delivered within hours of a qualified order. We have also built a broad program of custom options that allow for a virtually unlimited design assortment. Sunbrella offers a 5 year warranty for all its Upholstery fabrics which are the most suitable for building Umbrella shades, but they also offer an Awning and Marine grade product that includes a 10 year warranty. We can build your umbrella with this material, but you'll have to contact us for additional information. Included here is the Upholstery level fabric selection, sorted by our pricing levels and delivery service capacity.

SUNBRELLA EXPRESS

Sunbrella Express Colors fall under the category of premium Sunbrella fabrics offered with products that come with your choice of completed covers, which are made available at our California based facilities. Express colors ship out within 10 days and come in the following sizes on select umbrella frames: 11ft DWV umbrellas 9ft SWV umbrellas 7.5ft SWV umbrellas.

SUNBRELLA STOCK

Sunbrella Stock Colors are Sunbrella Fabric selections kept in stock at our California facility (subject to fabric availability) for production purposes. Umbrellas that fall within the Sunbrella Stock category have a ship out time of 15 business days with the umbrellas frames of all models.

SUNBRELLA CUSTOM

Custom fabrics for umbrellas can be made using many types of fabrics. California Umbrella is proud to offer a choice of the Sunbrella Custom fabric range for production of a new umbrella in all model options. Umbrellas ordered with these fabrics will ship out within 15 – 25 days based on availability of the fabrics only.

Sunbrella A Grade fabrics are the Outdoor and Furniture Grade fabrics of choice for most of the world's best outdoor furniture manufacturers. Made up of solids and stripe patterns, the A Grade fabric offers tremendous choice along with great value. These colors are constructed to be more naturally fade resistant under prolonged sun exposure, so your shade solution stays beautiful for years of use and enjoyment.

5446 Forest Green	5408 Black	56000 Dolce Mango	56001 Dolce Oasis	5608 Seville Seaside	

Sunbrella AA Grade fabrics are enhanced to protect more sensitive color from fading under even the most extreme of sun exposure conditions. The colors in this grade of fabric are more sensitive to UV exposure, and thus require an increased protection built into the color process in order to ensure that your umbrella maintains the same vibrant look for years of usage. Included in this grade of fabric are some expanded options for special aesthetic weaves in the fabric, all of which provide unique design appeal to go with the peak fabric performance desired in an umbrella to stand up to all weather conditions.

OLEFIN

California Umbrella uses the finest Olefin to create 10 different color selections available for select 9ft umbrella models, wherever you see this logo, the umbrellas will ship out within 10 business days.

Umbrella Frames: 11ft DWV Umbrellas 9ft SWV Umbrellas 7.5ft SWV Umbrella

Olefin fabrics are an excellent fabric choice for customers looking to shade their space on a budget without sacrificing quality. Made with high durability synthetic Olefin fibers, Olefin fabrics offer improved fade resistance over lesser grade fabric materials like polyester and cotton without the added expense of acrylic canvas. Olefin fabrics are a strong value, so with some basic care they can give you several years of enjoyment. Olefin color selections match up perfectly with all the most popular colors on the market, so your shade solution is beautiful without breaking the budget.
